

4M GHILLIE SUIT

Multi-spectral concealment cloak for mission-critical movement

Engineered to neutralize NIR and thermal signatures while adapting to terrain. Breathable, packable, and built for field deployment — this lightweight poncho ensures you disappear, not just blend in.

NIR Reduction

Adjustable Hood Brim

Cinch Strap – Keeps it Close

Foliage Attachment Straps

Our technology is the latest alternative to current solutions, designed to restrict the user as little as possible while providing maximum comfort and the highest level of protection (wavelength range: 0.5–20 μm). Reflectivity exceeds 75 %, and the fabric provides shielding up to 70 dB (ASTM 4935) in the frequency range of 0.3 to 20 GHz.

SPECS

- Breathable – RET 4-6
- Anti-bacterial
- Mechanical resistance

OPERATIONAL PURPOSE

Designed for Movement, Built for Disappearance

The 4M Ghillie Suit was developed with direct feedback from reconnaissance teams, forward observers, and special operations units. It defeats thermal and infrared surveillance, adapts to any terrain, and packs away in seconds when it's time to move. From jungle to urban to alpine, this is your field cloak — not a costume. It performs. It protects. It disappears.

Built For: Sniper teams | Recon and surveillance patrols | SOF / Tier 1 units | Border operations | Concealment in NIR / thermal-rich threat zones

Our products use Infrahex® fabric composite designed for night operations in open terrain, it performs best at ambient temperatures ranging from 0 °C to 30 °C.

COLORS

Digital camo green

Digital camo sand

Digital camo winter
