CEO MESSAGE

Dear Partners and Professionals,

At 4M TACTICAL, our mission is clear: to equip those who protect others with uncompromising performance, reliability, and innovation. From the front lines to the city streets, every product we design is forged by experience shaped by real-world needs, tested in demanding environments, and refined by constant feedback from active users.

We are proud of our heritage. Founded by veterans of elite military and protective service units, 4M TACTICAL brings together deep operational insight and modern engineering to create systems that excel in the harshest conditions. Whether it's personal protection, load carriage, or mission-specific solutions, our goal is always the same: to enable the operator to focus on the task not their gear.

As our global presence continues to grow, our commitment remains unchanged. We listen. We adapt. We deliver solutions that evolve with today's missions and tomorrow's threats. Every 4M product is a reflection of the professionals we serve—resilient, adaptive, and uncompromising.

Thank you for placing your trust in us.

With respect,
Radek Duchek

GHILLIE SUIT

MULTI-SPECTRAL CONCEALMENT CLOAK FOR MISSION-CRITICAL MOVEMENT

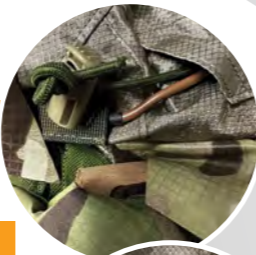

PRODUCT CODE: UN-115

Engineered to neutralize NIR and thermal signatures while adapting to terrain. Breathable, packable, and built for field deployment – this lightweight poncho ensures you disappear, not just blend in.

- 96 % thermal signature reduction
- Waterproof and wind proof
- The user stays cool as excess heat is effectively dissipated outward
- Designed to maintain the ability to manage magazines and guns while worn
- Storage in a fast-opening MOLLE pouch

NIR Reduction

Adjustable Hood Brim

Cinch Strap – Keeps it Close

WIND REPELLENT

THERMAL CAMOUFLAGE

Our technology is the latest alternative to current solutions, designed to restrict the user as little as possible while providing maximum comfort and the highest level of protection (wavelength range: 0.5–20 μ m). Reflectivity exceeds 75 %, and the fabric provides shielding up to 70 dB (ASTM 4935) in the frequency range of 0.3 to 20 GHz.

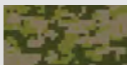

SPECS

- 96% Thermal Reduction – NIR absorption
- Breathable – RET 4–6
- Waterproof – water column >10 m
- Anti-bacterial
- Exceptionally thin and lightweight structure
- Mechanical resistance

OPERATIONAL PURPOSE

Designed for Movement, Built for Disappearance

The 4M Ghillie Suit was developed with direct feedback from reconnaissance teams, forward observers, and special operations units. It defeats thermal and infrared surveillance, adapts to any terrain, and packs away in seconds when it's time to move. From jungle to urban to alpine, this is your field cloak – not a costume. It performs. It protects. It disappears.

Built For: Sniper teams | Recon and surveillance patrols | SOF / Tier 1 units | Border operations | Concealment in NIR / thermal-rich threat zones

Our products use Infrahex® fabric composite designed for night operations in open terrain, it performs best at ambient temperatures ranging from 0 °C to 30 °C.

STRIKER

PLATE CARRIER

PRODUCT CODE: **BV-016**

4M is proud to present one of the lightest and yet most durable plate carriers available. Although weighing just 750 g, it still guarantees high durability and strength. The shoulder straps are constructed of Hypalon; material with a width of 25 mm. They allow comfortable routing of the radio/headset connecting cabling and the hydration hose. The straps are low-profile and height adjustable. The front cover flap is fully removable. This allows the vest to be adapted quickly to the needs of different missions and users by changing the platform with different mags or accessories. The side flaps (connectors) are made in our 4M own innovative way (protected by a registered design) and retain their shape even with mags fully loaded.

- Shoulder straps are constructed of Hypalon® and 25 mm webbing
- Shoulder pads thanks to a special design allow easy threading and securing of the wiring or hose of the hydrobag
- Size adjustment is enabled by side flaps (connectors) from both ends (front and rear) and their elastic segments.
- Adjustment of body circumference using MOLLE system in the back of vest
- Interchangeable front platform (QMR – Quick Mission Ready)
- Internal 3D material to increase wearing comfort
- Possibility to insert different sizes and shapes of ballistic plates with patented fixation system
- Specially designed side connectors hold pouches with heavy loads
- Flexible segments in the front side sections adapt to the body circumference during movement and increase wearing comfort
- EEH – Emergency Evacuation Handle

RAIDER

BALLISTIC VEST FOR UNIVERSAL USE

PRODUCT CODE: **BV-035**

4M's newest plate carrier model incorporates the most popular elements of all previous 4M vests and carriers. The design focuses on low weight, high abrasion resistance and superior material strength, without compromising comfort and ease of handling. The result is the RAIDER plate carrier.

- MOLLE system and shoulder lining straps to secure the cabling or hose of the hydro bag
- Zipped chest pocket
- M.Q.S. (Mission Quick Setup) front exchange platform with G-hooks
- F.R.L.S.™ (Flap Retaining Latch System) for quick, quiet and easy opening
- LOGMA™ (Load Grid – Mirrored Attaching) technology protected by a utility pattern on the side flaps
- Internal separate insert made of 3D material to increase wearing comfort and airflow is easily removable and suitable for washing in a washing machine with regular laundry
- Possibility of quick addition of soft ballistic inserts to the side flaps
- HAMPI-E2C (Heat and Moisture Protective Insert – easy to care) removable comfort liners
- EEH – Emergency Evacuation Handle
- Easily removable shoulder pads
- Easy and fast opening of shoulder straps

RAPTOR 2.0

MODULAR BALLISTIC SYSTEM

PRODUCT CODE: BV-017

RAPTOR 2.0 is the flagship product of 4M, the most advanced ballistic product developed in our workshop. We have listened carefully to the requirements of military and law enforcement personnel with combat experience from high-risk environments.

The basic module of the RAPTOR 2.0 ballistic protection system is a lightweight plate carrier with a quick-release feature, ensuring sufficient mobility during use. Thanks to the easily attachable accessories (add-ons), the basic module is easily upgraded to the level of a heavy vest with a ballistic coverage of 0.78 m². The user selects protection add-ons according to the threat level, the deployment environment and the user's role within the team or unit.

OPTION A/B*

option B includes ballistic sides

OPTION C

OPTION D

- Quick-release system ensures fast and reliable removal of components even in full configuration
- Neck protector with HCP® system allows use with a helmet or shooting from the prone position
- 3-piece removable H.F.J. (hinge folding joint) groin protector
- Rear pelvic and tail bone areas protector
- Compatible with MTB® modular tactical belt (with ballistic insert)
- Possibility to insert ballistic panels
- Total area coverage of the ballistic inserts in size L / XL is 0.78 m²
- Front, back and side strap binding

OPTION C/E

CONFIGURATION

- Multiple Pockets for soft and/or hard ballistic inserts
- H.F.J. Groin protector
- Collar (front, rear) with shoulder pad
- Large side flaps with integrated ballistic insert and side ballistic plate pocket
- Shoulder joint protectors
- Rear protection
- Arm protection
- Thigh Protection

HORNET 2.0

BALLISTIC VEST FOR UNIVERSAL USE

PRODUCT CODE: **BV-022**

The HORNET 2.0 ballistic vest is primarily intended for everyday use, especially for patrol officers and security forces of a private protection agency. Thanks to its unique cut, the vest can be used for either outer wear or as a discreet, concealed vest. The outer material is easy to maintain and clean. It is a universal size that offers a significant logistical advantage by simply adjusting the settings of all individual parts. The HORNET 2.0 has the option of an additional 3D inner liner, which is easily removable and makes maintenance even easier.

- Can be used as concealed ballistic vest or external tactical vest
- Can be fitted with MOLLE attachment system for magazine pouches, etc.
- Reinforced shoulder parts ensure safe wearing, even with front and rear ballistic plates
- The HORNET 2.0 can be optionally fitted with HAMPI-E2C (heat and moisture protective insert - easy to care) removable comfort increasing liners
- The vest also contains a front and rear pocket for ballistic plate to increase the protection level
- Side flaps with size adjustment loop
- Flexible side section
- Adjustable shoulder straps

VIPER

PLATE CARRIER

PRODUCT CODE: **BV-043**

The 4M VIPER Plate Carrier is a robust, modular armor platform designed for high-threat operations, offering superior comfort, adjustability, and scalability. Engineered for top-loading ballistic plates, it features rapid-access admin storage, a low-profile silhouette, and full MOLLE compatibility for mission-specific loadouts.

- Top-loading front and back plate pockets with spiral zippers
- Integrated admin pouch with MOLLE panel and ID loop field
- Removable MOLLE flap secured via G-hook and Velcro
- Adjustable shoulder straps with breathable padding and cable routing
- Reinforced drag handle and customizable rear MOLLE panel
- Ventilated 3D mesh padding for airflow and comfort
- Adjustable side cummerbunds with internal Velcro and MOLLE webbing
- Internal anchor points for soft armor or ventilation inserts
- Durable construction with reinforced stitching and hardware

SPIRIT OPEN 2.0

COVERED WEAR

PRODUCT CODE: BV-040

The SPIRIT 2.0 T-Shirt provides ballistic protection designed for maximum concealment when worn during covert operations or for personal protection.

It can be worn for long periods of time in any temperature conditions. Fitted with flexible side zipper which allow easy and quick dressing and removing of the vest.

The T-shirt is made of an elastic material that retains its shape even after repeated wear, does not stretch, and always returns to its original state. The material is characterized by excellent moisture-wicking properties, breathability, anti-odor technology, and high abrasion resistance.

The lightweight hydrophilic mesh lining is highly breathable. Thanks to its composition and knit structure, it provides technology that ensures a cooling effect and quick-drying properties, making it suitable for demanding training and performance in the hottest conditions.

- T-shirt design for maximum concealment
- Made for everyday long-term use in variable temperature conditions
- Equipped with a side zipper, making it easy to open and take off
- The ballistic insert is stored in internal pockets and its vertical stability is ensured by a patented solution
- 360° ballistic protection, ballistic insert with overlapping sides
- Air circulation, cooling effect technology and quick-drying properties
- The exterior is resistant to mechanical damage and snags
- Very good moisture transport effect, breathability and anti-odour technology
- Extended bottom part into the trousers, to fix the position on the body

BALLISTIC PROTECTION

Ballistic inserts are offered in variety of solutions allowing customer to choose such an insert, that fulfils requirements.

NIJ 01. 04 and NIJ 01. 06 | IIA & IIIA levels | Possible knife resistance

VIP 2.0 VERSATILE COVERT VEST

PRODUCT CODE: BV-038

Versatile covert vest providing excellent body coverage, can be worn either under the clothes or on top of clothes as exterior vest. Discreet ballistic protection for concealed carry. Vest VIP 2.0 is designed for everyday wear in patrol service, personal protection or investigating police teams.

The outer material of the vest is smooth with special structure to reduce the grab of garment and is noiseless.

Flat VELCRO zippers are gentle on clothing, allowing individual adjustment of the vest on the body in shoulder and waist area. The vest is designed to be completely smooth and flat under garment and is not visible in any position when worn.

- The outer material reduces the adhesion of the outer garment and is noiseless
- Special Velcro zippers are gentle on clothing
- Individual adjustment of the vest
- The vest is designed to remain smooth so that it does not create undesirable folds and is not visible in any position when worn

BALLISTIC PROTECTION

Ballistic inserts are offered in variety of solutions allowing customer to choose such an insert, that fulfils requirements.

NIJ 01. 04 and NIJ 01. 06 | IIA & IIIA levels | Possible knife resistance

USED MATERIALS

Main material is smooth special fabric with antibacterial treatment. The treatment used improves the hygienic properties of the textile, reduces the formation of unpleasant odours, prolongs its life and increases comfort for everyday wearing. Composition 100% polyester

The lining/mesh is made of Coolmax fibres. Thanks to the active silver compound, it inhibits the growth of bacteria and provides anti-odour/antibacterial function. High breathability and cooling effect. Composition: 100% polyester

SPEC OPS BRAVO

HIGH-CUT BALLISTIC HELMET

PRODUCT CODE: **BH-055**

Lightweight polyethylene-composite helmet delivering Level IIIA ballistic and high V50 fragmentation protection in a comms-friendly high-cut shell.

- High-cut shell for headset/comms compatibility
- 4-point adjustable harness with split suede chin strap
- Rapid-adjust, two-way BOA® dial for superior stability, failsafe retention if the chin strap is uncoupled, and single-pull emergency release
- Integrated Picatinny® accessory rails
- Optional comfort systems: Omega Crown mesh or 4D memory pad system
- Optional NVG shroud, Velcro® patches, helmet covers, and eye pro integration

BALLISTIC PROTECTION

Tested to NIJ 0106.01, Level IIIA (protection against 9 mm and .44 Magnum)
Fragmentation: 17 gr FSP V50 = 735 m/s, exceeding U.S. MIL-SPEC ACH fragmentation requirements (tested per STANAG 2920 / MIL-STD-662F)

SPEC OPS DELTA

BALLISTIC HELMET

PRODUCT CODE: **BH-005**

- Designed for special units
 - Light weight, low shell profile ballistic helmet
 - No obstructions for clear view
 - Compatible with wide range of communication devices including ear plugs and intercom
 - Allows easy mounting of nvg, compatible with wide range of gas masks
 - Made of durable aramid material
- Protects against small arms projectiles and grenade and explosive fragments

OPTIONAL ACCESSORIES

- Picatinny side rails for mounting lamps, beacons & ear protection
- BOA fastening system for secure attachment
- Night vision device shroud
- Velcro panel
- Rubber cords
- Adjustable 4D memory foam pads for a perfect fit with NVG

BALLISTIC PROTECTION

NIJ 0106.01 Level IIIA, HP White 0401.01B Level IIIA and exceeds US mil spec for ACH helmet for 2, 4, 16, 64, 17 grain fragments.
Fragmentation: Protection against fragments from V50 450 m/sec (1480 fps) to V50 700 m/sec (2300 fps) according to STANAG 2920 (17 gr FSP) and US MIL STD 662F.

MICH OPTIONAL MICH MID

PRODUCT CODE: **BH-001 MICH** & **BH-002 MICH MID**

- Excellent compatibility with communication equipment, including ear protection and intercom
- Compatible with wide range of gas masks and various night vision goggles and tactical goggles
- Made of aramid or polyethylene providing robust protection against small arms projectiles, grenade and explosive fragments
- Four point attachment straps fixed to the helmet with ballistic resistant screws
- Stability, easy fastening and comfort ensured by right strap and inner padding system
- 2 variants of harness/inner padding – OMEGA, BOA

MICH MID – in addition to MICH features:

- Reduced front/side edge profiles
- Made of aramid or polyethylene material – low weight, durable

BALLISTIC PROTECTION

NIJ 0106.01 Level IIIA ballistic requirement providing protection against both 9 mm and 44 Magnum threats.

Fragmentation: 17 gr FSPs with a V50 of 735 m/s when tested according to the STANAG 2920/MIL-STD-662F test protocols. Exceeds the US MIL SPEC ACH fragmentation V50 requirements.

FASTENING SYSTEMS

OMEGA

Four-point harness with internal mesh. Ensures secure and firm fit on the head while providing very good ventilation

BOA

Four-point harness system with quick and smooth BOA fastening adjustment for the fastest and most comfortable fit ensures that the NVG is always in place and the helmet does not move. Provides ease of use even with gloves. There is a lifetime warranty on harness fasteners.

Ensures perfect fit and in combination with 4D combat pads allow comfortable use for many hours on duty.

Three options of inner pads can be used with BOA fastening:

- Adjustable inner 4D memory foam pads
- Standard foam pads
- Omega mesh

4M
TACTICAL

4M
TACTICAL

HARD BALLISTIC PLATE

4M ballistic plates are precision-engineered to meet a range of threat levels in accordance with NIJ Standard 0101.06. Available in multiple configurations, they provide protection against rifle rounds in both ICW (in conjunction with) and SA (stand-alone) formats.

Designed to be universally compatible with 4M plate carriers and armor systems, each plate offers reliable protection, lightweight construction, and multi-hit resistance.

Available in Level III, III+, III++, and IV | NIJ 0101.06 compliant | Ceramic + PE hybrid construction (SiC, AL₂O₃, or advanced composites) | Multicurve shaping for enhanced ergonomics | Optional side plate configurations | Standard dimensions: 250 x 300 mm | Stand-alone and ICW variants available

SOFT BALLISTIC INSERT

4M soft ballistic inserts provide lightweight, flexible protection against handgun threats, fragmentation, and shrapnel. Available in a range of NIJ-certified protection levels, they are engineered for comfort and high-performance integration with all 4M TACTICAL vests, plate carriers, ballistic t-shirts, and covert armor systems.

NIJ Standard 0101.04 and 0101.06 compliant | Available in Level IIA, II, and IIIA | Multi-panel, ergonomic cut for comfort and mobility | Designed for front, back, side, shoulder, groin, neck, and specialty zones | Flexible, durable aramid construction | Compatible with 4M outer carriers (STRIKER, RAIDER, RAPTOR 2.0, VIP 2.0, HORNET, SPIRIT, etc.)

OMEGA 2.0 UBACS

COMBAT CLOTHING

PRODUCT CODE: UN-107 + UN-110 (FR)

Designed to be worn under ballistic vests, the OMEGA 2.0 UBACS provides high breathability, freedom of movement, and protection in high-friction areas.

- Anatomically shaped sleeves enable full mobility without elastic panels
- Dual-entry sleeve pockets (top and side)
- Compatible with all elbow protector types
- Non-flammable body fabric for safety in high-risk scenarios
- Fire retardant variant available

MATERIALS

Sleeves & Shoulders:
50 % Cotton / 50 % Polyester
Multicam Variant: 50 % Cotton / 50 % Nylon
Ripstop grid with water & oil repellent treatment

Body:
60 % Modacrylic /
40 % Viscose (Outlast®)

OMEGA 2.0 TACTICAL BLOUSE

COMBAT CLOTHING

PRODUCT CODE: UN106 + UN-109 (FR)

Optimized for operations with or without a plate carrier, the blouse offers unrestricted movement, practical access to gear, and compatibility with protective equipment.

- Anatomical sleeve and back cut with no elastic
- Underarm ventilation zippers
- Dual-access sleeve pockets (top and side)
- Accessible chest pockets when wearing a vest
- Covered front zippers positioned to avoid secondary injuries under armor
- Detachable hip access panels for belt-mounted gear
- Rear lower compartment for raincoat or additional storage
- Fire retardant variant available

SIZES

WEIGHT

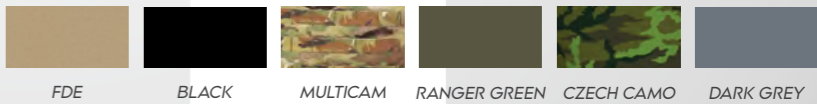

770 g

MATERIALS

Material composition: 50 % cotton, 50 % polyester (multicam 50 % cotton, 50 % nylon) – The ripstop material has a special treatment that is bonded to the fibres of the fabric.
This ensures long-lasting effectiveness against water, oils, etc.

(Other options according to your requirements)

OMEGA 2.0 PANTS

FIRE-RETARDANT COMBAT CLOTHING

PRODUCT CODE: UN-108 (FR)

OMEGA 2.0 combat pants are designed for military and police special forces. They are made of top quality materials with excellent ventilation and high durability.

Perfect freedom of movement is provided by the special anatomical design of the trousers without the need OF elastic fabric parts.

The pants are equipped with two external knee pockets, allowing insertion of all available types of knee pads, including Crye Precision® knee pads. This solution is patented by Crye Precision and 4M's OMEGA pants are licensed for its use.

BELT MTB

MODULAR TACTICAL BELT

PRODUCT CODE: **BT-001**

The modular tactical belt is designed to carry personal equipment, sidearms or handgun holsters.

Above all, it is intended as an extended protection of the pelvic area of the body thanks to an additional ballistic insert. The belt consists of several parts, each of which has its legitimate function and the user can choose the combination according to the purpose.

BELT PARTS

- **Load carrying belt (LC)** – Reinforced with PE foam and covered with separate panels with molle, always 2 pals elements vertically and horizontally
- **Internal lock-on belt (LB)** – 40 mm strap with velcro hook around the entire circumference. Functions as a connecting segment provided by MTB against movement. The belt can be threaded through ordinary trouser loops
- **Velcro couplings (CS)** – The connecting segments are 40 mm straps with a length of 10 to 20 cm, covered with Velcro on the reverse and front side
- **Emergency battle belt (EBB)** – The EBB is made of a 40 mm strap with a high-load safety buckle. It is threaded through the LC, variably below or above the individual molle elements according to the user's needs for the distribution of equipment on the belt or lc. The heavy-duty loop can be used for dragging loads (ie equipment or wounded mate) or, in case of emergency, it can be used for rappelling
- **Ballistic insert carrier (BC)** / optional / – Extended and anatomically shaped sleeve overlaps the pelvic area for protection against splinters and high-speed fragments. The level of protection is selectable according to the user up to IIIA according to the NIJ 0101.04 standard
- **Lumbar spine supporter (LSS)** / optional / – Heavy duty suspenders attach to the loops of the shooting belt and spread the weight of the entire load and the belt itself to the hips and shoulders

SHOOTERS BELT

TACTICAL BELT

PRODUCT CODE: **BT-010**

A low-profile tactical shooting belt with laser-cut MOLLE fields and an integrated inner belt system. Designed for competition or duty use, it ensures stability and secure load carriage with a premium COBRA® buckle.

FEATURES

- MOLLE-compatible laser-cut design
- Integrated inner belt with Velcro interface
- COBRA® buckle for secure closure
- Clash hook for attaching gear or accessories
- Minimalist, rigid construction to support holsters and pouches

SHOOTERS BELT

FIDLOCK EDITION

PRODUCT CODE: **BT-011**

Built on the same high-performance chassis as the COBRA® version, this model features a FIDLOCK V-Buckle for magnetic/mechanical closure with fast, secure engagement.

FEATURES

- Laser-cut MOLLE system for modular gear attachment
- Inner belt included with Velcro stabilization
- FIDLOCK V-Buckle for reliable and intuitive fastening
- Clash hook for auxiliary equipment

SINGLE POINT SLING

PRODUCT CODE: **PZ-001**

Engineered for submachine guns and compact weapons, this sling features elastic inserts for mobility and retention during rapid movement.

FEATURES

- Elastic insert for natural tension and quick shouldering
- Heavy-duty steel clash hook
- Adjustable length for wear with or without body armor
- Side-release buckle for fast detachment
- Possible endings
 - QD
 - PARACORD
 - CLASH HOOK
 - TG

SINGLE / DOUBLE SLING

PRODUCT CODE: **PZ-003**

A hybrid sling that seamlessly switches between one-point and two-point modes for flexible deployment. Ideal for adapting to changing mission needs.

FEATURES

- Convertible between single and double-point configurations
- Heavy-duty steel clash hooks
- 30 mm comfort-edged straps
- Side-release buckles on both ends for rapid release
- Quick-adjust metal buckle with strap eye
- Optional QD End Fitting

TACTICAL RIFLE SLING

PRODUCT CODE: **PZ-022**

Engineered for rifle carry with rapid conversion to a single-point setup, the PZ-022 combines secure QD attachment with two-stage length adjustment for both comfort and tactical speed.

FEATURES

- Dual QD (Quick-Detach) connectors at both ends for fast attachment to weapon QD sockets.
- Converts quickly between two-point and single-point configurations by clipping the front QD into the rear sling slot.
- Two methods of length adjustment: broad base adjustment for carry/fit and a 25 mm ladder strap with pull-tab for rapid tactical shortening/lengthening.
- Low-profile construction designed to sit comfortably with or without body armour.
- Durable hardware and webbing for reliable field use.

TACTICAL MAGAZINE POUCH

PRODUCT CODE: **SZ-095**

Built for durability and tactical retention, this pouch uses a unique plastic internal structure and optional closure systems for enhanced magazine security in high-movement environments.

FEATURES

- Textile flap or elastic cord closure (removable)
- Internal plastic retention shield
- Front-side MOLLE webbing for stacking
- Drainage hole for field use
- Automatic retention system with rubber band assist
- Variations for other ammunition type available.

LASER-CUT MAGAZINE POUCH

PRODUCT CODE: **SZ-084**

Designed for lightweight performance and adaptability, the Laser-Cut Pouch combines low-profile laser-perforated construction with elastic retention for fast, secure access to your magazines.

FEATURES

- Laser-cut MOLLE-compatible exterior
- Elastic cord retention with adjustable pull tab
- Secondary elastic tensioning cord with grip lock
- Lightweight, abrasion-resistant design
- Variations for other ammunition type available.

RANGE MAGAZINE POUCH

PRODUCT CODE: **SZ-090**

A simple and reliable solution for range use or general duty, the RANGE pouch prioritizes secure storage with flap protection and quick-release access.

FEATURES

- Velcro + plastic buckle flap closure
- Drainage hole at bottom
- MOLLE and belt compatible
- Variations for other ammunition type available.

TACTICAL DUMP POUCH

PRODUCT CODE: **TP-010**

Designed for fast-paced operations, the Dump Pouch offers compact storage that deploys instantly for retention of empty magazines, gear, or spent ammunition. Its collapsible profile keeps it low-profile when not in use, while retention cords and a drainage grommet keep contents secure and clean during high-mobility movement.

FEATURES

- Foldable, compact design with rapid deployment
- Retention cords for internal stability
- MOLLE attachment for vests, belts, or packs
- Drainage grommet to remove water, sand, or debris

UTILITY POUCH GROIN

PRODUCT CODE: **TP-002**

Originally designed for integration with groin protectors, this utility pouch doubles as additional storage on most front-flap plate carriers. Velcro attachment enables quick mounting, while the zippered main compartment and Velcro panel enhance utility and customization.

FEATURES

- Attaches beneath front flap of plate carriers via Velcro
- External Velcro panel for mounting ID or accessories
- Zippered pocket for tools or accessories

UNIVERSAL POUCH

PRODUCT CODE: **PD-029**

This MOLLE-compatible utility pouch is ideal for a wide variety of equipment, offering secure zipper access, modular attachment, and environmental resilience via integrated drainage.

FEATURES

- Multi-purpose storage for tools, devices, or gear
- Front-side MOLLE system for modular expansion
- Zipper closure for security and quick access
- Drainage holes to shed water and debris

MEDICAL POUCH IFAK

PRODUCT CODE: **PD-014**

The IFAK is a modular, quick-access medical pouch system designed for rapid deployment in trauma situations. With a removable inner insert, medical contents can be accessed immediately, while the outer shell remains securely mounted to the operator's gear.

FEATURES

- MOLLE-compatible outer sleeve for mounting on belts, vests, or packs
- Reinforced dual-zippered opening for easy full deployment
- Inner medical insert with elastic loops and compartments for organized loadout
- Velcro panel for ID patches or labels
- Quick-release system with buckle or hook-and-loop interface for rapid access
- Interior accommodates trauma essentials such as tourniquets, gauze, NPA, shears, and pressure dressings
- Side-mounted scissor holder with elastic loop and snap retention
- Drainage grommet at bottom of pouch
- Compatible with various mounting platforms including thigh, chest, or back panel systems

TACTICAL RADIO POUCH

PRODUCT CODE: **PD-036**

The Tactical Radio Pouch is a purpose-built, MOLLE-compatible pouch designed to securely carry and protect handheld radios in tactical environments. Built for rapid deployment and reliable access, it provides full control surface exposure while offering retention and protection during movement.

FEATURES

- Form-fitting design accommodates radios with antenna and accessory port clearance
- Adjustable retention tab with pull loop for added security
- Elastic retention strap secures radio without obstructing controls
- Reinforced bottom with drainage holes
- MOLLE-compatible attachment with dual strap anchoring for stable mounting
- Open-top design enables quick access to all dials, screens, and cable ports
- Quick and easy access to the battery without radio removal from pouch.

MODULAR PISTOL HOLSTER (PLASTIC / TEXTILE)

PRODUCT CODE: **PP-037**

A versatile holster solution designed for both right- and left-handed users. Constructed from durable fabric combined with a molded plastic insert, it offers secure retention and quick draw functionality in dynamic scenarios.

KEY FEATURES

- Modular and ambidextrous design
- Constructed from plastic and textile (polyamide or polyester)
- Mounting options: adjustable underbelt or MOLLE
- Plastic sight protector and drainage ports
- Two-stage retention system for enhanced security
- Compatible with handguns fitted with tactical flashlights

4M PLASTIC PISTOL HOLSTER (SUPPRESSOR VERSION)

PRODUCT CODE: **PD-037**

Designed for use with suppressed handguns, this ambidextrous holster provides reliable retention and compatibility with tactical silencers, while maintaining fast access under pressure.

FEATURES

- Modular, ambidextrous design
- Designed specifically for pistols with suppressors
- Mounting options: adjustable underbelt or MOLLE
- Built-in drainage holes
- Integrated safety retention system to prevent accidental loss

ODT 25 2.0

TACTICAL ASSAULT PACK

PRODUCT CODE: BA-012

The ODT 25 2.0 is a versatile tactical assault pack designed for rapid deployment and mission-specific adaptability. Built with the operational edge of special forces and field professionals in mind, this 25-liter pack combines rugged durability with lightweight comfort.

With an ergonomic, low-profile design and advanced modular features, the ODT 25 2.0 ensures balanced load distribution, streamlined profile, and superior performance in dynamic environments.

KEY FEATURES

- 25 l capacity with intelligently organized compartments for essential gear.
- Laser-cut MOLLE panels on front and sides for custom attachment of pouches and accessories.
- Padded back panel with high-ventilation 3D mesh to reduce heat and improve comfort.
- Adjustable shoulder straps, sternum strap, and waist belt for a secure and personalized fit.
- Dedicated laptop / hydration compartment with padded sleeve for mission-critical equipment.
- Side compression straps for load stabilization and profile adjustment.
- Heavy-duty zippers and reinforced stitching to withstand operational stress.
- Top carry handle for easy handling and quick transitions.

1,8 kg

CAPACITY

25 liters

APPLICATIONS

Engineered for rapid response, patrol, and reconnaissance, the ODT 25 2.0 is mission-ready for a wide range of tactical and outdoor scenarios.

FOB 40

FIELD OPERATIONS BACKPACK

PRODUCT CODE: BA-011

The FOB 40 is a mission-oriented, mid-sized tactical backpack engineered for field operations and extended deployment scenarios. With a 40-liter capacity, this versatile pack bridges the gap between mobility and capacity, ensuring operators can carry essential gear and mission-specific equipment in demanding environments.

Designed with ergonomics and modularity in mind, the FOB 40 features laser-cut MOLLE panels and multiple attachment points for mission-adaptable loadouts. Its robust construction using military-grade Cordura 500D and reinforced seams ensures rugged durability under extreme conditions.

KEY FEATURES

- 40 l main compartment with additional admin and secondary pockets for organized storage.
- Laser-cut MOLLE panels on front, sides, and waist belt for quick-access loadout customization.
- Removable helmet retention system with adjustable straps and secure cradle.
- High-ventilation 3D mesh back panel and padded shoulder straps for extended comfort and reduced fatigue.
- Integrated rain cover for rapid protection from inclement weather.
- Dual side compression straps for load stabilization and reduced profile.
- Dedicated internal compartments for laptop or hydration system compatibility.
- Reinforced top carry handle for maneuverability and transitions.
- Heavy-duty zippers and quick-release buckles for reliable closure and swift access.
- Adjustable sternum strap and padded waist belt for enhanced stability.

APPLICATIONS

The FOB 40 is purpose-built for field operations, reconnaissance, and extended patrols, offering exceptional versatility and comfort for the modern operator.

EXPEDITION 70 / 95

ADVANCED LONG-RANGE FIELD PACK

PRODUCT CODE: BA-013

The Expedition 70 is a mission-ready, long-range field pack engineered for extended deployments and rugged terrain operations. With a 70-liter capacity, this versatile pack seamlessly adapts to changing mission demands while maintaining operational comfort and load stability.

Crafted from military-grade Cordura 500D in Multicam camo, the Expedition 70 balances durability with streamlined modularity, making it the pack of choice for elite field units.

KEY FEATURES

- Additional side pockets allow for up to 95 l capacity.
- Integrated MOLLE webbing on all sides for mission-specific loadout customization.
- Removable helmet carrier for secure external storage of ballistic or bump helmets, easily detachable based on mission profile.
- Modular side pouches that can be added or removed as needed, enabling full mission flexibility and streamlined profiles.
- Adjustable shoulder straps, sternum strap, and padded waist belt for optimal comfort and weight distribution.
- Reinforced 3D mesh back panel to reduce heat buildup and improve airflow during long treks.
- Integrated rain cover for rapid weather protection.
- Reinforced top carry handle and compression straps for load stability under stress.
- Heavy-duty zippers for operational reliability.
- Internal mesh admin compartments and hydration system compatibility for superior organization.

4,8 kg

CAPACITY

70-95 liters

APPLICATIONS

The Expedition 70 is engineered for multi-day reconnaissance, extended patrols, and survival missions, making it the go-to pack for operators requiring maximum versatility and long-range capability.

SNIPER BAG

BACKPACKS & WEAPON BAGS

PRODUCT CODE: TZ-008

Designed for tactical deployment and long-range mobility, this sniper bag supports rifles 1100 to 1250 mm length. The integrated folding shooting mat (230 cm) enables rapid conversion to a firing position with full-length moisture protection and bipod compatibility.

KEY FEATURES

- Backpack-style carry system with adjustable shoulder, chest, and hip straps
- Integrated shooting mat with MOLLE zone and bipod grip, detachable for field use
- Removable external pouches with MOLLE interface for customized loadout
- Central utility pocket includes shoulder strap, doubles as a standalone pouch
- Multiple interior and exterior pockets for optics, NVG, thermal, or maintenance gear
- Flexible internal layout with adjustable compartments and tie-downs
- Durable construction using Cordura 500 and Nylon F-Tex materials

WEIGHT

4,6 kg / 4,8 kg

LENGTH

1 100 mm / 1 250 mm

MATERIALS

Outer shell: Cordura 500 / Nylon F-Tex
Composition: 100% Polyester or 100% Polyamide

CLEANING KIT

PRODUCT CODE: PD-017

The Cleaning Kit is a compact, field-ready maintenance set designed for professional users. Housed in a thermoformed, semi-rigid case with integrated MOLLE attachment, it supports multiple calibers and fits easily into a thigh pocket or the interior of a tactical pack. Designed for efficiency and durability, the kit contains everything required for barrel and chamber cleaning, tool-based disassembly, and maintenance in the field.

KIT FEATURES

- MOLLE-compatible, thermoformed case (15 x 9 x 3.5 cm)
- Caliber-specific variants available:
 - 9x19 Scorpion EVO
 - 5.56x45
 - 7.62x39
 - 7.62x51 NATO
 - .308 WIN TSR

STANDARD COMPONENTS *(varies slightly by caliber)*

- 650 mm flexible cable
- Two-piece segmented cleaning rod (adapter)
- Slotted tip for cleaning cloths
- Bore and chamber brushes (caliber specific)
- Nylon utility brush
- Cleaning cloths
- Oil bottle
- Multitool or sight tool (variant dependent)
- Combined tool with punch, Torx T25, and cable handle
- Caliber-specific accessories (e.g., EVO3 sight key, BREN2 multitool)

**BORN FROM
THE BATTLEFIELD**

**BUILT FOR
THE MISSION**

OUR STORY

4M TACTICAL was never about filling a gap in the market.

It was about solving problems that only those who've been in the fight truly understand.

We founded 4M TACTICAL in 2015 after serving as war veterans and co-founders of the SOG special anti-terrorist unit. Between us, we carried nearly two decades of operational experience, including deployments to Iraq, Kosovo, and Afghanistan. Those years taught us one lesson above all: in combat, every detail matters. When you use your equipment for dozens of hours a day, poor design or low quality can lead to fatigue, injuries, or even mission failure. Especially behind enemy lines, equipment failure can have far-reaching consequences. To succeed, you must be able to rely 100% on your colleagues, your weapons, and your gear.

That's why we built 4M TACTICAL. To design and manufacture equipment that professionals can depend on.

Since then, 4M TACTICAL has grown into a comprehensive design and manufacturing company in the field of tactical equipment and ballistic protection, supporting special forces, police officers, and soldiers across Europe and beyond. Under the leadership of Radek "CHOMBER" Duchek, we remain true to our original ethos: build smart, reliable equipment, test it without compromise, and serve those who serve.

Our goal is simple: produce gear that won't let you down. Gear that performs, provides comfort, and works exactly as you need it to so you can focus fully on your mission. From the first stitch to the final deployment, every product we make is built with this goal in mind.

Because at 4M TACTICAL, we don't just make gear.

We make gear proven on the battlefield.
